

A Guide to Uploading to Google Classroom

Submitting your work online

If a piece of work is set using Google Docs, it should be as straightforward as clicking 'Turn in' in the top right corner. However, if we only ever set work using Docs, the children would be restricted in what they can submit.

In all Google Classroom assignments there is the option to '+ **Add or Create**'. In this section, you can attach photos or files from other software such as Microsoft Word or Powerpoint.

+ Add or create

Mark as done

We have created a 4 minute support video for how to do this . Please access by following this link. [Support Video](#)

We also recommend downloading **the free Google Classroom app** to make this even easier (see the video for support with this).

For information on how to access Google Classroom, or how to access Live sessions please [follow this link](#).
