

Our Eco plans for 2022

Although it has been challenging to organise meetings and activities, eco projects have continued in different groups, such as...

Measuring air pollution in Merton Hall Road

Litter picking

Parents helping improve the school grounds on Community Day

Eco Reps have been thinking hard about all the things that will help make Wimbledon Chase more Eco friendly this year.

We completed an Audit looking at the 10 topics covered by Eco Schools, to see how we are doing at Wimbledon Chase.

We looked at ...

* Biodiversity

* Energy

* Litter

* Waste

* Water

* School Grounds

* Healthy Living

* Transport

* Global Citizenship

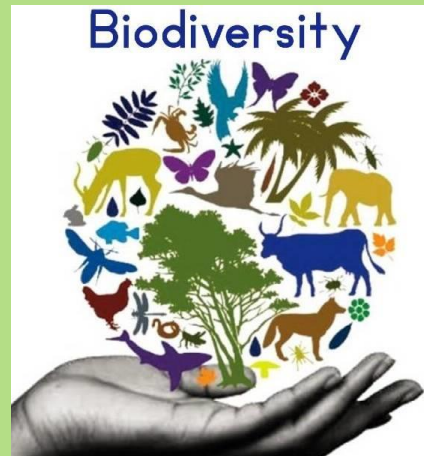

* Marine

Eco Reps decided to focus on 3 areas that need to be improved:

Waste and Recycling

Biodiversity

Healthy Living

We made an action plan to try to improve these areas at Wimbledon Chase.

Recycling

Here are our recycling bins which quickly fill up to overflowing, leaving no room for classroom paper waste.

We are working to find a solution this year.

What else could we reduce or recycle?

- We are also researching what else can be recycled, such as used glue sticks and whiteboard pens

- Get new food recycling bins for fruit and veg waste in the playground

- Try and reduce or even ban things like plastic straws and glitter

Biodiversity

We plan to restore the Bugmill at the front of the school,

Create a new wildflower area to attract butterflies and bees

Create more insect and small animal habitats

Healthy Living

- More plant based food choices at lunchtime
- Encourage healthier snacks and pack lunches
- Promote playground games and use of the school grounds for outdoor learning
- Encourage walking or scooting to school
- Create some whole school wellbeing events.

Watch out for our Eco News in Mr Ellis' newsletters, including tips for things you can do at home to help the environment.
